FEATURES & BENEFITS

Flexible Cooking Functions

Each function has been perfected to deliver the optimal heat for a wide range of dishes, with 9 functions including Air Fry, Fan Forced, and Pizza Bake.

Considered Design

Simple and intuitive control makes cooking easy, with a responsive dial and clear illuminated icons that enable straightforward function selection. Designed to integrate seamlessly into your kitchen, this built-in oven sits flush with cabinetry to minimise gaps and create a cohesive, streamlined look.

Multi-functional Accessories

Thoughtfully designed accessories expand your cooking possibilities. Designed to fit seamlessly into the side ladders, each accessory sits securely in place for confident cooking. The Multi-Functional Air Fry Tray promotes even airflow for crisp, golden results, while the Baking Tray, Roasting Dish and telescopic sliding runners provide versatile options that work seamlessly with your oven.

Effortless Cleaning

Pyrolytic cleaning uses very high temperatures to break down food residue into fine ash, so there's no need for scrubbing or harsh chemicals. Once the cycle is complete, any remaining ash can be easily wiped away, helping keep your oven clean with minimal effort and less time spent on maintenance.

Cook With Consistency

Whether Baking, Roasting or preparing several dishes at once, AeroTech™ technology circulates heat evenly throughout the cavity, helping to deliver consistent results throughout the oven.

Generous Capacity

More room means greater flexibility when cooking. With an 85L total capacity, this oven provides ample space for multiple dishes, larger meals, and everyday cooking.

Engineered for Life

Built for enduring performance, our Ovens undergo intensive testing equivalent to 7,300 hours or 20 years of real-world use, delivering durability you can rely on.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
