

LPGGRI01AU

CILINDRO GRINDER

PREMIUM GRIND QUALITY

Thanks to 50mm flat burrs and a direct drive motor, you can achieve uniformly sized coffee grounds at any setting. At 1.6 grams per second (espresso), there is minimal heat exposure while the beans are being ground, ensuring a more aromatic result in the cup.

TOUCH DISPLAY

The LCD display provides access to two dose settings (single and double cup) as well as a manual setting. Adjust the time setting in 0.1 second increments to achieve a precise dose.

MICROMETRIC GRIND SETTINGS

With an easy to use regulator knob access an infinite number of grind settings, allowing you to fine-tune the grind and therefore the extraction process. This makes them ideal for espresso and pour over.

600G CAPACITY

The generous 600g capacity of the grinder allows for ample storage of fresh coffee beans. Entertain a large number of guests easily without the need to constantly refill the hopper and provide them with a fragrant coffee in minutes.

FEATURES

Dimensions	154mmW x 230mmD x 410mmH
Finish	Chromed aluminium
Weight	6.7kg
Burrs type	Flat
Burrs diameter	50mm
Burrs material	Hardened steel
Hopper capacity	600g
