Left Hinge

EXTERNAL TEMPERATURE CONTROL

Smeg wine cellars feature a user-friendly touch-control display on the outside of the door glass, which allows access to change temperature, humidity and light without opening the door. This prevents changes in the internal temperature, reduces vibration and exposure to UV rays.

38 BOTTLE CAPACITY

Storage of up to 38 Bordeaux (750ml) bottles. Perfectly shaped housings provide ample storage for different shaped bottles including Champagne and magnums.

PREMIUM OAK SHELVES

Telescopic sliding oak shelves allow for easy placement, storage and removal. The smooth movement prevents disturbance of wine sediment. Made in Italy, these racks are crafted from the same oak as traditional wine barrels.

UV RESISTANT GLASS

Thanks to Smeg's Eclipse black-glass technology, wine is perfectly shielded. The layered glass protects wine from damaging light and gives maximum transparency. Solar light and UV rays can alter a wine's structure, ruining its balance and flattening its scent.

TWO VARIABLE TEMPERATURE ZONES

Two independent temperature zones can be set externally, at the correct temperature for storage of red, white and sparkling wine.
