FEATURES

Microwave grill combination	Defrost	Fast heat up	Intuitive LCD display
Programmable timer	Easy Clean		

BENEFITS

Quick meals, perfect heat Microwave with hot air provides dual functions, microwave and convection cooking, combining hot air circulation and microwave function with the option to re-heat, cook and defrost your dish, so your food is cooked faster and more evenly.	Set up & stay ahead Program the settings on your oven with ease and keep up with the progress of your meal with clarity, using the LCD display. The two-coloured display shows you time, temperature and the progress of what you are cooking, as well as access to other functions and settings to make the most out of your oven.
The perfect grilled finish Add a delicious crisp finish to lasagnes with the oven's grill function. The built-in heating element projects heat downwards to delicately brown or toast your meals.	Defrost gently. Retain taste. This appliance efficiently defrosts food, using a low heat to preserve the texture and taste of ingredients. Because gentle defrosting delivers delicious dishes.
Evenly cooked results The wide glass turntable is perfect for large dishes, ensuring evenly cooked results and preventing cold spots.	Extra-safe triple glazing A triple glazed door keeps the oven cooler-to-the-touch, even when oven is running at maximum temperature. The shatterproof internal glass is ultra-safe and the reflective coating helps to direct heat back into the oven to maximise efficiency.
